INNOVAZIONE

3D tech

La tecnologia 3D Tech consente di applicare differenti materie ceramiche, anche a spessore, in perfetta corrispondenza con la grafica sottostante, realizzata in digitale ad altissima definizione. Un processo produttivo rivoluzionario, che combina la matericità con l'estetica del prodotto, fino ad ottenere superfici dallo straordinario valore sensoriale.

The new 3D Tech technology allows thick layers of various ceramic materials to be applied in perfect alignment with the underlying graphic designs, which are created digitally with extremely high definition. This revolutionary production process combines material and aesthetic effects to create surfaces with extraordinary sensorial appeal.

ANTIQUE 3D

La finitura Antique 3D richiama il fascino dei marmi consumati dal tempo, unendo eleganza classica e autenticità. Caratterizzata da un corpo leggermente strutturato, combina rilievi delicati e texture materiche per creare superfici dall'aspetto vissuto, ideali per donare agli spazi un carattere unico e un design ricco di personalità.

The Antique 3D finish is reminiscent of the charm of timeworn marbles, combining classic elegance and authenticity. Characterised by a slightly structured body, it combines delicate embossing and material textures to create surfaces with a lived-in look, ideal for giving spaces unique character and a design rich in personality.

LUX 3D

La finitura Lux 3D si caratterizza per il suo effetto lucido e brillante, pur mantenendo dettagli in bassorilievo per un effetto visivo sofisticato e ricercato. Ideale per ambienti moderni ed eleganti, dona un senso di spaziosità e luminosità grazie al riflesso della luce sulle superfici.

The Lux 3D finish is characterised by its glossy and luminous effect, while maintaining bas-relief details making it visually sophisticated and refined. Ideal for modern and elegant settings, it bestows a sense of space and luminosity thanks to the light reflecting on the surfaces.

DECORATIONS NAT 3D

Le superfici tridimensionali Nat 3D offrono un effetto naturale e autentico, grazie a texture che richiamano materiali grezzi. Questa finitura è ideale per chi desidera creare ambienti dallo stile essenziale e contemporaneo, aggiungendo un tocco di carattere che valorizza ogni spazio.

Nat 3D three-dimensional surfaces feature a natural and authentic effect, thanks to textures that evoke raw materials. This finish is perfect for anyone who wants to create spaces with a minimalist and contemporary vibe, adding a touch of character that can enhance any and every space.

INNOVAZIONE

SOFT 3D

La tecnologia SOFT3D consente di realizzare lastre dalla finitura extra morbida arricchite da effetti di bassorilievo che ne esaltano la naturalezza. La differente densità delle materie utilizzate in superficie, nelle zone selezionate, ricrea chimicamente le profondità, che si sovrappongono in maniera esatta alla grafica digitale ad alta risoluzione.

The SOFT3D technology allows to create slabs with an extra smooth finish, enriched with bas-relief effects that enhance the naturalness of the surface. The different density of the raw materials applied in the selected areas, chemically recreates the depths that exactly match the high-resolution digital graphic.

P. tech

La tecnologia P.TECH migliora la resistenza allo scivolamento, pur mantenendo una piacevole sensazione al tatto. P.TECH è il risultato di un innovativo processo produttivo che coniuga la selezione delle materie prime con le fasi di pressatura, cottura e lavorazione a fine linea. I prodotti P.TECH, pur raggiungendo i più elevati coefficienti di attrito, si puliscono facilmente, per questo possono essere utilizzati nei progetti wellness e outdoor, anche in aree pubbliche o commerciali.

The unique P.TECH technology improves slip resistance while maintaining a pleasant tactile sensation. P.TECH is the result of an innovative production process that combines a meticulous selection of raw materials with the pressing, firing and end-of-line processing stages. Despite their high coefficient of friction, P.TECH products are easy to clean, making them ideal not only for use on indoor floors but also in wellness and outdoor spaces in public or commercial areas.

6MM

La ceramica va per il sottile

Le piastrelle a 6mm di spessore offrono un'installazione più pratica e veloce grazie alla loro leggerezza e maneggevolezza. Lo spessore ridotto mantiene intatta la resistenza e la versatilità delle superfici in gres, riducendone l'impatto ambientale.

Our 6mm thick tiles are light and easy to handle and therefore quicker and more practical to install. Their reduced thickness maintains all the strength and versatility of porcelain stoneware surfaces while lowering their environmental impact.

POSA SOPRAELEVATA DA ESTERNO

Il sistema di pavimentazione sopraelevata prevede l'utilizzo di supporti portanti di tipo autolivellante, regolabili oppure fissi che si adattano con semplicità e sicurezza ad ogni tipo di pavimento sottostante. Il sistema permette la realizzazione di piani di posa con altezze variabili, da terra, comprese fra 25 e 270 mm. L'indipendenza della pavimentazione dai supporti garantisce l'assorbimento di eventuali movimenti strutturali. Il sistema sopraelevato non necessita di massetto in cemento e consente una diminuzione del peso sulla struttura portante. Le fughe aperte tra una piastrella ed un'altra consentono un facile defl usso dell'acqua piovana evitando tutti i rischi di accumulo o di ristagno. La presenza dell'intercapedine fra il piano di calpestio e il piano di appoggio favorisce l'areazione e l'isolamento termico. Questa soluzione permette inoltre il passaggio di impianti e tubazioni nell'intercapedine, e la facile ispezione degli stessi una volta installata la pavimentazione.

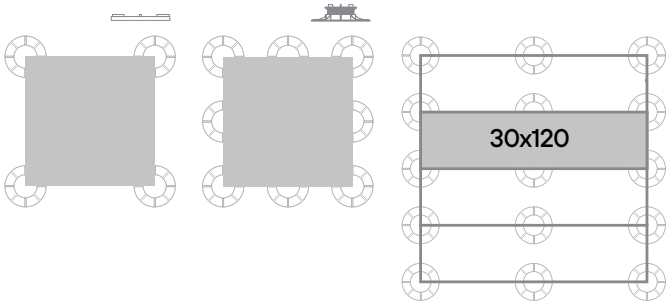

OUTDOOR RAISED INSTALLATION

The raised paving system is constructed using fixed or adjustable self-levelling supporting pedestals, which adapt easily and safely to any kind of substrate. The system is able to construct paved surfaces at heights from 25 to 270 mm above the ground. Since the paving is not rigidly connected to its pedestals, any settling within the structure is absorbed. The raised paving system does not require a concrete screed and reduces the weight on the substrate. The open joints between tiles facilitate rainwater run-off, avoiding all risks of flooding or standing water. The cavity between the paving surface and substrate improves aeration and thermal insulation. What's more, utility systems and pipes can be housed in the cavity and are easily inspected once the paving has been installed.

Logistica nuovi sistemi di imballo

LOGISTICS NEW PACKAGING SYSTEMS

L'innovazione della gamma GARDENIA SLABS si esprime anche attraverso la parte logistica del progetto. Gardenia rivoluziona il sistema di imballaggio delle lastre ed è a oggi l'unica azienda che ha portato il sistema a cavalletto impilabile alla dimensione di cm 75x284x147,5 (lastre 120x280), 75x168x109 (lastre 80x160) e 75x26x200 (lastre 26x200).

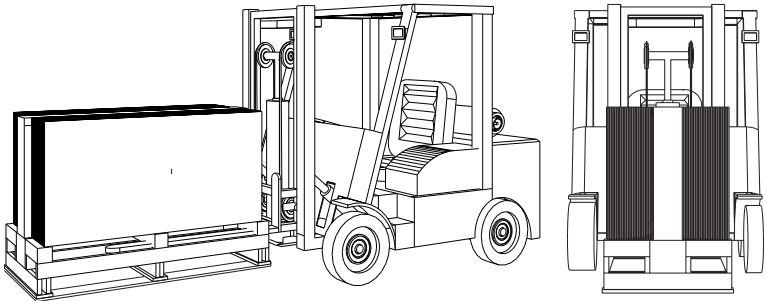

Questi i principali vantaggi offerti:

- essendo impilabile permette di ottimizzare gli spazi all'interno dei magazzini.*
- la profondità di 75 cm consente di sfruttare a pieno il volume di carico dei container (3 pallets ne occupano perfettamente la larghezza).
- Il posizionamento verticale del prodotto garantisce una maggiore protezione delle lastre durante le fasi di trasporto.
- facilita le operazioni sul cantiere in quanto le lastre si trovano già posizionate in verticale, il materiale è facilmente ispezionabile e removibile per l'installazione.
- le dimensioni complessive del cavalletto consentono maggiori spazi di manovra all'interno dei locali di posa rispetto alle casse tradizionali e agevolano il sollevamento del materiale mediante mezzi meccanici (gru-montacarichi).
- è caratterizzato da un sistema di regettatura che consente di liberare anche 1 solo collo alla volta, senza compromettere la stabilità del materiale che rimane sul pallet, evitando così il rischio di rotture. Le lastre dovranno essere liberate rispettando la sequenza opposta rispetto a quella con cui sono state confezionate, quindi iniziando dall'ultimo collo regettato.

Innovation in the GARDENIA SLABS range is also reflected in the project's logistics. Gardenia has revolutionised the packaging of ceramic slabs and is the only company to have expanded the stacking rack pallet system to the 75x284x147,5 (slabs 120x280), 75x168x109 (slabs 80x160) e 75x26x200 (slabs 26x200) cm size.

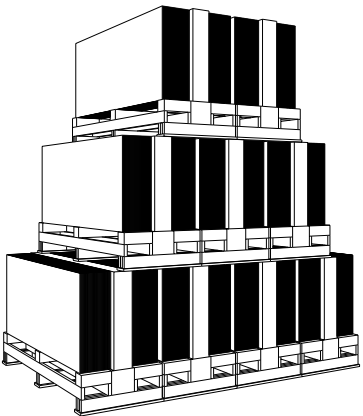

This has the following advantages:

- stacking optimises the use of space in warehouses.*
- the 75 cm depth enables full use of container load space (3 pallets fit perfectly side by side). The vertical positioning of the product better protects the slabs during shipping.
- it facilitates work on site, since the slabs are already positioned vertically, making the material easy to inspect and remove for installation.
- the overall size of the rack pallet provides greater space for manoeuvring in the installation area in comparison with conventional crates, and also makes it easier to lift the slabs mechanically (with a crane or lift).
- the rack pallet system employs strapping which allows the user to remove a single package at a time without affecting the stability of the other packages on the pallet, thus minimising the risk of breakage. The slabs must be released from the packaging by reversing the packaging sequence, i.e. starting with the last package to have been strapped on.

Modalità di trasporto consigliata per ottenere la massima visibilità.

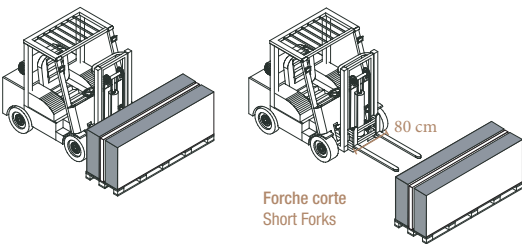

Recommended transport system for maximum visibility.
